DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-39 and 61-63, drawn to an apparatus for separating fluid from a biologic sample.

Group II, claims 40-60, drawn to a method of conducting an assay utilizing a device for analyzing a biologic sample.

Group III, claims 64-78, drawn to a device for separating fluid from a biologic sample.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group II lacks the same or corresponding special technical feature of Group I which is the microspheres disposed in an abutting relation and forming interstitial spaces.

The inventions listed as Groups II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group III lacks the same or corresponding special technical feature of Group II which is the microspheres that form the interstitial spaces.

A telephone call was made to Brandon N. Sklar on March 7, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
